**Profile** HBM Healthcare Investments actively invests in the human medicine, biotechnology, medical technology and diagnostics sectors and related areas. The company holds and manages an international portfolio of some twenty-five promising companies. Many of these companies have their lead products already available on the market or at an advanced stage of development. The focus of investment is on follow-

on financing for existing portfolio companies. These portfolio companies are closely tracked and actively guided in their strategic directions. This is what makes HBM Healthcare Investments an interesting alternative to investing in big pharma and biotech companies. HBM Healthcare Investments has an international shareholder base and is listed on SIX Swiss Exchange (ticker: HBMN).

# Management Report

## Dear Shareholders

Our portfolio's fundamentally positive performance trend was continued during the period just ended. Despite a slightly negative currency effect, HBM Healthcare Investments generated a profit of CHF 109 million in the second quarter of the current business year. This follows on from the CHF 64 million profit achieved in the first quarter. In the first six months of the 2013/2014 financial year, the Company thus earned profits totalling CHF 173 million.

The net asset value per share (NAV) rose from CHF 75.80 to CHF 87.16 during the reporting period. Factoring in the par value repayment of CHF 1.50 per share that was made on 9 September 2013, this corresponds to an increase of 17.0 percent. At the same time, the share price gained 14.7 percent, to close the quarter at CHF 65.00.

## Performance of portfolio companies during the quarter under review

The Ophthotech initial public offering was extremely successful, with both the number of new shares issued and their issue price well above the original price range. The company placed 8.7 million new shares at a price of USD 22 each, thereby raising USD 192 million in new capital. By the end of September, Ophthotech's share price had risen by a further 35 percent. Before the company went public, HBM Healthcare Investments had invested USD 19.5 million in Ophthotech at an average price of USD 5.69 per share. It also subscribed for a further USD 5 million investment at the IPO. The Ophthotech holding contributed a total of CHF 52.0 million to results for the quarter.

At Pacira Pharmaceuticals, marketing activities for the long-acting analgesic Exparel™ continue to generate considerable success. In addition, new study data confirmed the benefits of Exparel™ for further indications, such as artificial knee joint implants. The company's market capitalisation rocketed by a further 66 percent during the quarter just ended, and now stands at USD 1.6 billion. This resulted in a book profit of CHF 28.5 million for HBM Healthcare Investments during the second quarter.

There was a CHF 15.4 million increase in the value of the Basilea Pharmaceutica holding during the quarter under review. At the end of September, Basilea published the results of the first of three phase-III studies (the SECURE study) for its antifungal compound Isavuconazole. This showed that the drug is slightly more effective than the current standard therapy Voriconazole, with a better safety profile. Basilea is expecting the results of a further phase-III study (the VITAL study) before the end of the year. Together with data from the SECURE study, this may provide a basis for the submission of an application for regulatory market approval for the drug in the first half of 2014. In addition, Basilea is awaiting the decision on European market regulatory approval for its Ceftobiprole antibiotic. This is also due before year-end.

In September, the UK company SkyePharma received Japanese market approval for its asthma drug Flutiform®, which has been licensed for sale in Europe since the summer of 2012. The price of SkyePharma's shares shot up by around 62 percent during the quarter under review, which contributed CHF 7.3 million to HBM Healthcare Investments profits.

The other public holdings in Swedish Orphan Biovitrum, Enanta and PTC Therapeutics also performed positively during the period, contributing CHF 23.1 million in total to profit for the quarter.

There was a setback with the holding in ChemoCentryx, however. The phase-III study for the Crohn's programme did not achieve the desired results. Also the interim data from the phase-II study into a compound to treat kidney failure caused by diabetes are, as yet, inconclusive. ChemoCentryx shares dropped by 61 percent over the period, which reduced the quarterly results by CHF 12.9 million. The damage is nonetheless limited, because HBM Healthcare Investments has so far sold around 70 percent of its initial holding in ChemoCentryx. This has yielded 1.3 times the capital originally invested.

### Outlook

In the medium term, the companies in the HBM Healthcare Investments portfolio remain well positioned to add further value. The risk attached to the largest holding, Basilea, has been reduced by positive top-line data from its first phase-III study. With the forthcoming publication of data from the VITAL study and the approval decision for Ceftobiprole, the company will reach further important milestones by the end of the year. This should give an additional boost to the value of our holding. At Pacira, Investors will continue to focus on progress with the marketing of Exparel™. Regarding the holdings in Enanta, PTC and Ophthotech, we must wait for the results of the phase-III studies that will run over the next 6 to 24 months.

The high proportion of public companies in the portfolio has increased its vulnerability to market volatility, irrespective of the fundamental performance of the companies it contains.

In the private companies segment, we expect further trade sales, IPOs and financing rounds that should feed through into their value.

# Consolidated Interim Financial Statements

## Notes

### 1. Summary of significant accounting policies

The consolidated interim financial statements have been prepared in accordance with the International Financial Reporting Standards (IFRS) IAS 34 on Interim Financial Reporting, and the provisions of the SIX Swiss Exchange Additional Rules on the Listing of Investment Companies. These interim financial statements should be read in conjunction with the Consolidated Financial Statements for the financial year ended 31 March 2013, as they provide an update to the latest full financial report. In preparing the interim financial statements, the same accounting policies and methods of computation have been applied as in the preparation of the annual financial statements.

A summary of the new and revised IFRS/IAS standards and interpretations effective in the year under review is provided on page 48 of the Consolidated Financial Statements of the 2012/2013 Annual Report. The use of these standards and interpretations had no significant impact on the financial condition or the earnings situation of the Company, or on its accounting policies.

The following exchange rates were used in the preparation of the financial statements:

(CHF)	30.9.2013	31.3.2013
DKK	0.1641	0.1632
EUR	1.2241	1.2168

### 3. Other financial assets

The sale of a number of investment positions has given HBM Healthcare Investments contractual claims to further purchase price payments that are contingent on the achievement of defined targets.

These claims are carried in the annual financial statements at a risk-weighted value, discounted over time (discount rate of 11 percent). The following summary shows the value carried in the balance sheet compared with the potential cash flows:

(CHF million)	Book value as at 30.9.2013	Range of possible cash flows, minimum	Range of possible cash flows, maximum	Expected period of payment
ESBATech	7.1	0.0	49.5	2014 – 2018
Mpex <sup>1)</sup>	4.2	3.5	> 35.9	2013 – 2029
mtm laboratories	15.0	0.9	26.9	2015 – 2016
Other companies	8.2	2.5	24.5	2013 – 2019
<b>Total</b>	<b>34.5</b>	<b>6.9</b>	<b>&gt; 136.8</b>	

1) There is no ceiling on potential cash flows. The amount shown here is calculated on the basis of a sales estimate.

Of the total book value as at 30 September 2013, CHF 29.4 million is carried under other financial assets (claims from investments held by HBM Healthcare Investments directly). A further CHF 5.1 million is reported under investments, other private companies (claims from investments held indirectly via HBM BioCapital (EUR) L.P.).

If the companies concerned are successful, these contractual claims could result in future payments which are many times the reported book value.

### ESBATech

The company was acquired in September 2009 by Alcon Inc. The purchase price comprised an advance payment of USD 150 million, as well as a further USD 439 million in milestone payments that are tied to the achievement of clinical development targets. In addition to the advance, HBM Healthcare Investments has to date received a small initial milestone payment. Further milestone payments are anticipated from 2014 onwards.

### Mpex

The company was acquired in April 2011 by Axcen Pharma Inc. (now named Aptalis). Aptalis is paying the purchase price in cash – a guaranteed portion in tranches up to 2014, and the remainder as milestone payments contingent on market licensing and sales successes. HBM Healthcare Investments will receive around USD 4 million in several tranches up to 2014. Further payments of up to USD 7 million

will fall due upon the approval of the Aeroquin™ antibiotic in Europe and in the USA. HBM Healthcare Investments is also entitled to turnover-based payments on the basis of product sales up to 2029. These may correspond to several times the current book value of the investment.

### mtm laboratories

The company was acquired in July 2011 by Roche. The purchase price of EUR 190 million comprised an advance payment of EUR 130 million and EUR 60 million as performance-based milestone payments. HBM Healthcare Investments has received the advance payment. The performance-related milestone payment is expected in 2015.

### Other companies

“Other companies” relates primarily to contractual claims from the sale of the investment holdings in Adnexus, Asthmatx, Broncus, Nereus, Syntonix and Vivacta, which are tied to sales growth, advances in clinical development and product approvals.

## 4. Shareholders' equity

### 4.1 Share capital

As at the balance sheet date, the Company's share capital amounts to CHF 520.65 million, divided into 8,900,000 registered shares at a par value of CHF 58.50 each. The Ordinary Shareholders' Meeting of 21 June 2013 decided to cancel 300,000 treasury shares. In addition to this capital reduction, the Shareholders' Meeting approved a par value repayment to shareholders of CHF 1.50 per registered share, which was paid on 9 September 2013. Both capital reductions were entered in the Commercial Register of the Canton of Zug on 30 August 2013.

### 4.2 Treasury shares

The Ordinary Shareholders' Meeting of 22 June 2012 authorised the Board of Directors to repurchase a maximum of 920,000 of the company's own shares via a second trading line. The share buy-back programme is intended to reduce capital and will run until 30 June 2015 ("Share buy-back programme 2012"). Under this share buy-back programme a total of 333,200 of the Company's own shares have been repurchased to date. Thereof 190,000 of the Company's own shares, in combination with the not yet cancelled 110,000 shares acquired under the share buy-back programme 2009, were cancelled. The Company holds 143,200 of its own shares (31 March 2013: 263,000 own shares) as at the balance sheet date of 30 September 2013. In the 6-month period of the current financial year, a total of 180,200 of own shares were acquired over the second trading line at an average price of CHF 58.73.

In addition, as at the balance sheet date, HBM Healthcare Investments (Cayman) Ltd holds 152,176 treasury shares (144,362 as at 31 March 2013),

acquired over the regular trading line. During the 6-month period up to the end of September 2013, a total of 69,482 treasury shares were acquired over the regular trading line at an average price of CHF 55.08 per share (previous year: 183,258 shares at CHF 49.89), while 61,668 treasury shares were sold at an average price of CHF 57.39 (previous year: 162,746 shares at CHF 48.34). The gain of CHF 0.4 million (previous year: gain of CHF 0.03 million) from trading in treasury shares, which is reported in shareholders' equity, is based on the proceeds of shares sold, minus the pro-rata average acquisition price of all shares purchased over the regular trading line.
